

Tracktion T7™ + DAW Essentials Collection™

Included with your new Mackie product, the multi-award winning Tracktion T7 DAW + DAW Essentials Collection gives you the power to unleash your creativity with a simple yet advanced user-interface, production tools, and a powerful plugin suite.

Tracktion T7

T7 is a multi-award-winning workstation, featuring powerful and creative tools to inspire the modern musician. Unlike typical 'Lite' versions, we do not impose any restrictions – you get unlimited track count, powerful features, compatibility with all popular plugins and efficient performance on Mac, Windows and Linux operating systems.

- **BLUE STEEL USER INTERFACE**

We've packed a lot of new features into a single screen that was already highly utilized. To accommodate the upgraded feature set, we've made the screen much more dynamic with the addition of greater visual depth, a carefully coordinated color palette and just enough animation to keep things clear while you're rolling.

- **CLIP LAYER EFFECTS**

Clip Layer Effects is a new, patent pending technology giving you the ability to stack multiple effects and processing on an individual clip, as opposed to just using plugins on a complete track.

- **AUTOMATION PATTERNS**

Just choose a parameter to automate, apply a common pattern and either tweak further or move on. A fast and easy way to apply precise movement to anything in your edit.

- **LFO MODIFIERS**

T7's new LFO Modifier allows you to automate any parameter on any plugin (VST & AU) or channel control element (filter).

SYSTEM REQUIREMENTS

MacOS 10.7.5 or Later

Intel Core i5 2GHz Processor
4GB RAM (8GB Recommended)
