

RELEASE NOTES

ShowBox V1.1.x • March 2024

Introduction

These release notes describe changes and upgrades to the Mackie ShowBox firmware since Version 1.0.x.

Quickly double-tapping the main volume knob will display the firmware version of the ShowBox (“base”, replacing the FX1 scribble strip) and the breakaway mixer (“UI”, replacing the FX2 scribble strip). The FX will be displayed again after 4-5 seconds.

Updated Firmware Versions:

ShowBox Base: 1.1.86

ShowBox Breakaway Mixer: 1.1.95

New ShowBox firmware may be found at the link below under the Download & Resources section.

System Requirements

- Windows 10/11
- macOS 10.12 or higher required

Supported Devices

- ShowBox

ShowBox V1.1.x

The following is a list of items that have been added, changed, or fixed since ShowBox V1.0.x.

- Added a feature to format SD cards via ShowBox.
- Fixed an issue where the SD format from NTFS shows “Format Error” even after a successful re-format.
- Fixed an issue where an SD recording became corrupted when the ShowBox battery died during the recording.
- Fixed an issue where the SD record button continued to slow-flash even when the SD card was full.
- Fixed an issue where the SD recorder did not create a new recording once the file system limit had been reached.
- Fixed an issue where muting FX1 and/or FX2 would block the long press feature.
- Fixed an issue where the indoor/outdoor mode button did not alter the voicing.
