This illustrates how to use the SRM150 as a personal monitor. Mount the SRM150 on a microphone stand using the Mic Stand Mounting Bracket included with the SRM150. Attach the Boom Extender (also included) to the top of the SRM150 and use a microphone boom to hold your microphone.

Connect the microphone and an instrument to the SRM150 (Channels 1 and 2), and a playback device like an MP3 player to Channel 3.

Here the SRM150 is used as a personal monitor and the SRM450 is the main PA speaker.
Two SRM150s are used as floor monitors to provide a stereo monitor mix for the keyboard player.

**TWO SRM150s: STEREO MONITORING**

**SRM150: A/V CART**
