

1642VLZ4, 1642-VLZ3 and 1642-VLZ PRO Rack Bracket Installation

The enclosed Rack Brackets enable the 1642VLZ4, 1642-VLZ3 or 1642-VLZ PRO to be mounted to a standard 19" equipment rack.

Parts

Rack Brackets Contents – Part No. 090-291-90:

2 Rack Ears – Part No. 550-461-00

4 M3.5 x 0.6 x 8 mm Silver Screws – Part No. 0020991-08

1 Installation Instruction Sheet – Part No. 820-211-00

Tools

Required Tools (not included):

Phillips screwdriver

Bracket Installation

1. Turn off the mixer and disconnect the power cable.
2. Remove the two outer screws from each side of the mixer, as shown in the illustration below. These same four screws will be used again with the 1642-VLZ PRO, so don't lose them!

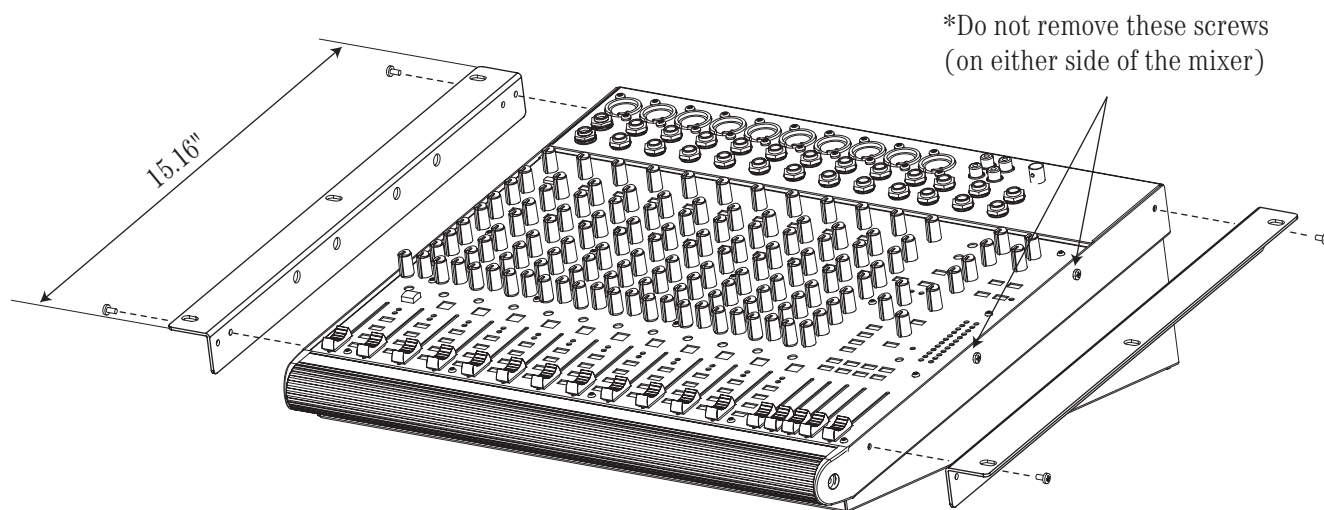

Note: Do not remove the two inner screws from each side of the mixer.*

3. Align the rack brackets along each side of the mixer. They are identical, so it does not matter which bracket goes on which side.

4a. **1642VLZ4 / 1642-VLZ3:** Replace screws with the M3.5 x 0.6 x 8 mm silver screws supplied with this kit. Do not overtighten.

4b. **1642-VLZ PRO:** Replace screws. Do not overtighten.

5. Install this assembly into the rack, allowing room at the top for the power cable and other connections.
