

# iP-CM100 Ceiling Mount Installation Instructions

## Description

The contents of the iP-CM100 Ceiling Mount Kit allow you to mount an iP-Series loudspeaker from the ceiling. Only one iP-Series loudspeaker may be mounted per iP-CM100 Ceiling Mount Kit.

### iP-CM100 Ceiling Mount Kit (Part No. 2045577) contents:

Part No.	Quantity	Description
2045577	1	iP Series Ceiling Mount Kit
2045710	1	Printed Instruction Sheet

### Required Tools (not included):

Hand wrench or socket wrench  
Drill and drill bit  
Four (4) lag bolts or inflation screws  
5mm Hex Key

## Safety First!

Before installing and using this product, please read these instructions carefully and keep them on hand for future reference. Failure to follow the precautions may result in damage, injury, or even death.

**! WARNING:** When installing this product, always respect the safety standard. Do not install the product in any way that is not described in these instructions.

**! WARNING:** The iP-CM100 Ceiling Mount has been tested to a Working Load Limit (WLL) of 47 lb / 21 kg with a 5:1 safety factor. Never apply a load that exceeds the Working Load Limit.

Before mounting the speaker, make all of the necessary calculations to ensure that all of the components are used within their nominal work load range. Remember that the weakest component determines the safety level of the entire installation.

Be sure to select the appropriate lag bolts or inflation screws for the type of ceiling to which the iP-CM100 and iP-Series loudspeaker will be mounted.

## Ceiling Mount Installation

Only one iP-Series loudspeaker may be mounted per iP-CM100 Ceiling Mount Kit. Follow the steps below once you have found a suitable position for the speaker.

1. With the bracket held in place, use a pencil to mark the four holes of the top plate. Once marked, put the bracket down.

2. Using a drill bit that is smaller in diameter than the lag bolt or inflation screw, drill each of the four marked holes.

3. Put the bracket back in place where you just drilled the holes. Fully screw each of the four lag bolts or inflation screws through the ceiling mount bracket into the ceiling until they are firmly against the bracket.

4. Place the iP-Series loudspeaker on to the vertical arm of the ceiling mount bracket, lining up the four holes.

**NOTE:** The loudspeaker may be attached horizontally or vertically.

5. Fully screw each of the four screws through the ceiling mount bracket into the iP-Series loudspeaker until they are firmly against the bracket. Be sure the loudspeaker is secure before releasing it.

**VERY IMPORTANT:** Test the installation with the loudspeaker in different positions to ensure that the bracket stays firmly secured to the ceiling.
